

Top of Baseball, bat & glove holder. (bb&g )

#### Helpful Hints

It may help to cut out this template on the lines so it may be used to locate the position on the wall. Then take a sharp object ( screw, nail, pencil, pen) and push through the fastener marks above so the sharp point leaves a small mark on the wall so the fastener can be aligned properly. Leave the head of the fastener protrude out from the wall about 1/4 to 5/16 of an inch, you can move the fastener in a little if the bb&g holder doesn't snug the wall. Align the large part of the keyhole slot over the head of the fastener and slide the holder downward gently until it hits the top of the slot. That is it.

If multiple hangers are used you may arrange the pattern on wall with paper cutouts to help assist in the arranging of holders.
